Abstract

This project involves the analysis, design and implementation of what is defined as online Web based information system specifically for Education Management to monitoring and evaluation of the Teaching performance Island wide location by different Zone level System applications. This prototype is complete with a graphics-style user interface for Secretary, Director, PDE, ADE and Master teachers to access and process the information they need at different hierarchy level of Staff permission allowed. System designed using the Object-oriented analysis and designed techniques. The scope of this particular implementation has been limited in respect of time given. The coding has been executed using PHP embedded with HTML software package.
