Sri Lanka

T_EX is an ASCII text-based markup language. In a scheme of automated scientific document preparation L^AT_EX provides the foundation, which is also a markup language created from T_EX. In this work a user-friendly editor was developed integrating the Tamil text-based ASCII characters with the Tamil L^AT_EX characters via character mapping process. These conversions of Tamil text-based fonts have been interfaced with the L^AT_EX engine to produce L^AT_EX output such as DVI, PDF and PS.
